Sequence 15, Application US/08924287A

Patent No. 6699838

GENERAL INFORMATION:

APPLICANT: Abbott Laboratories

APPLICANT: Davidson, Donald J.

TITLE OF INVENTION: NOVEL ANTIANGIOGENIC PEPTIDES,

TITLE OF INVENTION: POLYNUCLEOTIDES ENCODING SAME APPLICATION: ANGIOGENESIS

FILE REFERENCE: 5940.US.P3

CURRENT APPLICATION NUMBER: US/08/924,287A

CURRENT FILING DATE: 1997-09-05

PRIOR APPLICATION NUMBER: US 08/851,350
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  RESULT 14
